

Ascom teleCARE IP® Motion Sensor

As part of the Ascom teleCARE IP solution, the teleCARE IP Motion Sensor is a wireless motion detector used for multiple purposes in the senior living environment.

A senior living facility can use a motion sensor anywhere due to the wireless functionality, making it easy to install when and where it is needed. Reliable and nonintrusive resident monitoring helps to enhance the safety and efficiency of care, and helps to improve resident and caregiver satisfaction.

How It Works

When resident movement is detected, the system triggers a message. This message can be used to directly alert a caregiver or can be configured with a time sensitive delay.

Examples

Direct alert when a resident is attempting to leave the designated environment.

Presence in the bathroom or shower with configurable time parameters for alerting the caregiver.

Automatic check in detection of resident movement at predetermined time intervals assures the caregiver of the resident's activity. In person caregiver verification is not required and helps to maintain the resident's privacy.

Key Features

- Small device blends into the environment of residents room
- Adjustable sensitivity and detection field
- Wireless connectivity to the Ascom system
- Battery operated with a battery life of at least three years (150 activations per day)
- Low battery warning notification to staff
- Diagnostic motion LED inside for installation purposes but avoiding disturbing residents

Key Benefits

- Enhanced care and safety while preserving dignity
- Improves staff efficiency
- Wireless technology for flexibility in installation
- The assurance of using state-of-the-art, but proven, technology from a global leader in mission-critical communication solutions

Motion sensors for activity monitoring anywhere it is required in the senior living environment.

About Ascom

Ascom is a global solutions provider focused on healthcare Information and Communication Technology (ICT) and mobile workflow solutions. The vision of Ascom is to close digital information gaps allowing for the best possible decisions – anytime and anywhere. Ascom's mission is to provide mission-critical, real-time solutions for highly mobile, ad hoc, and time-sensitive environments. Ascom uses its unique product and solutions portfolio and software architecture capabilities to devise integration and mobilization solutions that provide truly smooth, complete and efficient workflows for healthcare as well as for industry, security and retail sectors. Headquartered in Baar, Switzerland, Ascom has subsidiaries in 15 countries and employs approximately 1,200 people worldwide. Ascom registered shares (ASCN) are listed on the SIX Swiss Exchange in Zurich.

The availability, configuration and technical specifications of Ascom products, services and solutions may vary from country to country. Please ask your nearest Ascom representative for further details.
