

Ascom automation: giving clinicians more time for direct patient care

Ascom's Automated Presence Solution is a smart bedside, real-time staff location and documentation solution at the point of care that leverages the combined power of Telligence, Mobility and Unite through the Ascom Healthcare Platform.

Benefits include:

- More time for care by eliminating manual registration and documentation of staff presence in patient care areas
- Fewer workflow steps with the option to automatically cancel low priority calls and tasks upon entering patient rooms
- Optimizes Return On Investment by leveraging existing infrastructure and the Ascom Healthcare Platform: no need for additional third-party equipment
- Enhances family and patient satisfaction via real real-time, and retrospective reporting of direct patient and staff interaction

Automatic Presence Registration from Ascom

View and manage a wide range of critical information at the point of care:

- Convenient. No need for additional tags or badges. Functionality is already included in the Ascom smartphone.
- Logs key compliance and regulatory data. Response times to patient requests are automatically documented.
- Nurse rounding presence and documentation frees up caregiver time.

Ascom ListView is the heart of the nursing unit with audible tones, visual alerts, patient precautions, and staff location for complete coverage.

About Ascom

Ascom closes digital information gaps across points of care, creating actionable, context-rich insight that supports enhanced clinical decision making. Ascom streamlines the flow of critical information and care activity to help clinicians improve care management, coordination and delivery. Bringing a dynamic portfolio of clinical and care solutions into one integrated, flexible framework, the Ascom Healthcare Platform enables healthcare facilities to harness the power of clinical information, optimize care workflows and maximize the value of their existing technology investments. Many of the world's advanced healthcare institutions, including leading hospitals and digital-forward facilities, utilize Ascom technology to help elevate clinical and operational performance.

Multiple products from Ascom and third parties support the features and functions described. All Ascom solutions may not be available in specific countries.
